TAKEN UNDER ACT 14th & 15th Vict. Chap. 49. Arthur Shaw **ENUMERATOR.**

Information as to Mills, Factories, &c., &c., their cost, power, produce, &c.	Number of persons usually employed therein.	General Remarks of the Enumerator.
39	40	41
		The Enumerator considers the present mode the best that has yet been adopted to arrive at a correct Census, yet he cannot see the necessity of Columns 16 & 17. Members Absent. these columns it appears to him will have the effect of making the general return imperfect to the extent of the number of Members Absent returned. The Enumerators will of course number all that sojourned in the house on the 11th Jan. Consequently members absent will have a double return. The remuneration allowed by Statute for payment of Enumerators in Townships is I am aware insufficient. I have been 27 days faithfully employed in taking the census for this Township (and I can do it as soon as any other person having been the Assessor and Enumerator for the last 15 years) and the return shows a Population of 2253 for which by Statute £11.5.3 which is less than 8/6 per day including expenses & Horse. If it is intended by the Government to allow the same pay for names on the Agricultural sheets it will help to make up deficiency
