One Sawmill 2 Saws drove by water cuts about 50000 feet of lumber per year. Cost \$250	6	6 Saws in operation
One Sawmill 1 Saw drove by water cuts about 100000 feet of lumber per year. Cost about \$150	4	4 Saws
One Other Sawmill in building to be drove by water supposed to cost \$150		
		I find this Township thinly settled with bad and crooked roads so that the person going from the first settler in part of the Township to the last settler in the rear would have to travel a distance of about fourteen miles and return by the same road to get to another settlement more to the west of the Township than from the first settler on the East side of the Township to the last settler on the West side of the Township would have to travel a distance of about eight or 20 miles generally through the woods or lumber roads crooked and bad to find any settlements of all the islands & cuts by the same road, in one instance I had to travel six miles to get to 3 Turn in shanties and back by the same road.
		There is but one Schoolhouse in this Township, in which they have Methodist Preaching once a fortnight.
		I find in this Township the wheat crop has been very much injured by the Weevil this year more than in former years so that the yield has been nearly destroyed and the rot in the Wheat has done great damage. Other crops such as Oats and Indian Corn has been very much destroyed by Wild Carminsects as Bears, Racoons & Squirrels.
