

Information as to Mills, Factories, &c., &c., their cost, power, produce, &c.	Number of persons usually employed therein.	General Remarks of the Enumerator.
39	40	41
		<p>The McMillan, McDaniel, Ross & McMartin are of the first class at least in what respects, and in spending for the last 20 years, taught by a female teacher - belonging to the preceding & following sheet - the fact where it may education is not progressing as it ought in this township - it was melancholy to see groups of young intelligent looking children that could not say they attended any school during any part of 1857 - the people seems to be divided on two many instances, either on the side when the school should be kept the delay or capacity of the teacher, whether free or upon the old system the I found a strong feeling against the free school system in this township, some old & intelligent farmers said that nothing could be more unreasonable than to tax them for educating other people's children, just at a time when they were themselves educating their own children, I would be telling them that their children's children in this township long would be educated by the very people having the benefit of the system now, in many cases they would say if I could then assume them that such should be the case they would have nothing or less now against the system, but that they expected nothing else when such a period would arise from the necessity of them enjoying the benefit of the system now, but to turn round and deny it to them, I would tell them if they and others like would give in to the system now, the Legislature would have made them ^{care} that some to be continued on next sheet.</p>
