		<p>✓ In my instructions I was directed to note the rivers, brooks and general Character as far as rivers there is none in my Division and the roads were covered so deep with snow there was no such thing as finding them but being acquainted with the roads in summer I wish say they surpass any other locality for miles around the main road to Wellington is nearly on all the way gravelled so it is as good as most of the Macadamised roads and the soil is good in general we have but very few streams in my division and those only fast for a few months Spring and fall the Character of the soil is various some sandy loam some gravelly land and some clay ground but in general is as productive in good seasons as any land in the adjoining Counties the potato crop has rather failed this year past and also winter wheat which you will see by the number of acres and the produce from it's but the Spring crops in general are as good as in years past</p>
